

## Altro Serenade™

Altro Serenade resilient flooring has been engineered to create the ideal environment to heal, learn and live.

In demanding areas with constant noise and foot traffic, such as hospital and school corridors, comfort underfoot and sound reduction are paramount. This 3.9mm thick flooring provides comfort underfoot, making life easier on the feet of students, patients and hard-working staff who spend countless hours on the move.

The 54 IIC rating (19dB of sound insulation) limits sound transmission between floors, ensuring the flurry of steps above doesn't interrupt those relaxing below.

In spaces where pedestrians have a higher risk of tripping and falling, such as healthcare and senior living Altro Serenade's additional padding can help prevent injury.

Because not every space is created equal, one product does not fit all – Altro Serenade may work in one room, but adjacent flooring can have different needs. Altro Serenade coordinates with Altro Orchestra and Altro Operetta, the three flooring ranges sharing many colors with different levels of thicknesses and sound reduction to suit whatever it is the environment demands.

Manufactured with 24% rapidly renewable biobased content and certified for low VOC emissions, Altro Serenade can help facilities achieve environmentally-friendly and LEED goals.

### About Altro

Altro is a world-leading manufacturer and innovator in commercial floors and walls. We turn ordinary interiors into thriving environments, transforming spaces to enhance people's emotional and physical well-being.
