

## Altro Wood™ Collection

### Combining performance with modern design

Whether the space demands homey aesthetics or contemporary feature areas, our new Altro Wood collection can help turn design visions into realities.

Take your pick between our three flooring ranges – Altro Wood™, Altro Wood™ Comfort and Altro Wood™ Acoustic. Altro Wood Comfort and Altro Wood Acoustic ranges are thicker (2.85mm and 3.9mm), providing comfort underfoot and sound reduction for noisy environments. The two ranges boast 15 dB and 19 dB of sound insulation, respectively, with Altro Wood Acoustic featuring an impressive IIC rating of 54, making it ideal for installations where sound transmission is of concern.

While we've kept many old favorites, our collection of cool and contemporary and warm and traditional colors has been enhanced with modern fine-line patterns, along with wide-plank classic and rustic designs.

The hallway may need sound resistance, but not the office at the end. Adjacent area types can have different needs, so we've matched color options across all three ranges to allow for a consistent look throughout – no matter the performance required.

Altro Wood complements our other floor and wall solutions, coming with industry-leading warranties and technical support.

As a responsible designer and manufacturer, we take sustainability seriously – these ranges are made in Europe with 22% rapidly-renewable bio-based content and are certified for low-VOC emissions.

### About Altro

Altro is a world-leading manufacturer and innovator in commercial floors and walls. We turn ordinary interiors into thriving environments, transforming spaces to enhance people's emotional and physical well-being.
