ICF's Introduction's at NeoCon East 2017

Philadelphia, PA November, 2017

Airbloom by Stefan Borselius

Nature, with its shifting seasons and multitude of forms, is the source of inspiration for this addition to ICF's collection of acoustic screens. Airbloom modules are made from molded felt fiber and are available in ten standard colors. Modules hook into one another and are hung on a wall mounted straight rail, curved ceiling rail, or directly to a drop ceiling using special brackets.

Bower Collection and Nest Table by Adam Goodrum

The **Bower Collection** is inspired by the rambling-style nests created by the bowerbird of Goodrum's native Australia. Open, organic and gentle, this collection of work pods, lounge chairs and adjustable screens brings a natural and calm aesthetic to the workplace. The architecture of the collection's design also supports visual and acoustical privacy. Entirely modular, the Bower range of products is designed for ease of assembling on-site in work places.

Nest is a set of two tables that functions together or individually. When stacked, they create totemic shapes that add interest to any room. When deployed, they cantilever over sofas, beds and chairs, or simply float around a room. Mix and match your set of Nest tables from a range of powder coated aluminum colors, laminates and wood to create a custom configuration that suits your home or office.

Lovi Trees by Anne Paso

Add a little magic to offices, public spaces, store displays, events or to your home. Lovi trees are made from the highest quality PEFC certified birch plywood. The birch wood comes from Finnish forests, which are re-planted after felling. Both Lovi Spruce Trees and Lovi Trees are quick to assemble without the need of any tools. The trees are packed flat for easy shipping. Lovi Trees provide a sense of wonder and delight to any space. Water not required!

Monza Chair Series by Konstantin Grcic

The **Monza Bistro Chair** has a beech wood structure lacquered natural or black stained. Like all Monza chairs its backrest is polypropylene and is available in black, white, cafe latte, caramel or terra brown. The Monza Bistro seat is made of polyurethane foam with a flexible integral skin matched to the backrest colors.

The **Monza Outdoor Armchair** has a sturdy iroko wooden structure that is oil treated to provide further protection. Its backrest is polypropylene in black, white, traffic red, yellow green, light blue, wine red, cafe latte, caramel, or terra brown colors.

Mood Chair Series by Hans Thyge & Co.

Mood is based on an animated design that plays on subtle references to the human body. The beautifully shaped seat with its textured surface prevents you from sliding forward on the seat. A slight waterfall on the seat edge creates an open angle between upper body and legs, thereby extending comfort over longer periods. And a distinctive backrest gently meets your lumbar to ensure that you are sitting in an upright posture.

The Mood chair series consists of six models, each with their own functionalities, yet which still fit into the collection as a whole. The many models, choices of shell colors and upholstery combinations make Mood an extremely versatile chair that allows for a variety of design expressions.

Penne Chair by Julia Läufer & Marcus Keichel

Penne combines the spirit of Scandinavian chair design with the requirements of the modern contract furniture market. The chair was intended to be an iconic piece of furniture and a real industrial product - Penne is the world's first chair that incorporates laminated wooden tubes in its design thereby reducing weight and use of resources. Craftsmanship and technology meet in a

unique concept. Penne is the winner of the Red Dot Award 2017! reddot award
product design

These designs can be viewed in the ICF/Unika Vaev space 1119, at the NeoCon East Show

The ICF Group is pleased to sponsor the NeoCon East 2017 Keynote presenters at the **ICF Group Keynote Theater**, located on the show floor.

The keynote line up is as follows:

Wednesday, November 15

SUZETTE SUBANCE FERRIER, IIDA

Studio Design Director, TPG Architecture
